A3 (H2) Zero-shot residual vs source size (n = 53 checkpoints, subgrid beats 90% of Base single-grid sources)
base (single grid)
small (single grid)
tiny (single grid)
subgrid-pretrained (base, 100 topologies)
mean zero-shot relative active residual (dimensionless)
10^1
10^0
10^2
10^3
10^4
number of buses in the source (training) grid
